

# DUAL ABRASIVE BLASTROOM

WORLDS BEST BLASTROOM  
DUST COLLECTORS

- ▶ The perfect blastroom for anyone fabricating both steel and stainless steel products and not wanting to buy a blastroom for each metal type.
- ▶ One blastroom utilises both steel grit and glass beads/ceramic/plastic as the blasting media to allow surface etching and surface cleaning processes.
- ▶ Abrasive recovery system designed to fully separate different abrasives types ensures no contamination of the glass beads and no magnetism induced into the steel grit.
- ▶ Full floor abrasive recovery allows fast change over from one type of abrasive to other to ensure maximum blasting up time.
- ▶ Can be used in conjunction with our heavy duty work piece trolley system allowing items up to 50 tonne to be blasted with ease.

Blasttechnik Pte Ltd 10 Admiralty Street #02-69 North Link Building Singapore 757695
