ABP-375

BLAST POTS

The ABP-375 is a certified single chamber blast pot suitable for blasting applications that require longer blasting times without stopping for refilling. With a capacity of 375 litres the blasting time can be almost doubled compared to a standard 200 litre blast pot.

The ABP-375 may be fitted with one or two blasting nozzles. When two nozzles are fitted the pot is configured in pressure hold style to permit both operators to blast independent of each other.

Full flow piping and valves ensure minimal pressure loss at the nozzle and ensure maximum blasting production rates are achieved.

The ABP-375 may be supplied as independent blast pot or as a package including all required blasting and operator safety equipment.
